C-TRUE & STALLION SECURITY provide face recognition security solutions to South Africa Football Association (SAFA)

Johannesburg, South Africa, February 8, 2009 --- Following several comprehensive trials in South Africa, C-TRUE Face Recognition technology was approved by the South African Football Association (SAFA) for access control security to critical SAFA facilities including the office of the CEO, Mr. Raymond Hack.

Stallion Security, C-TRUE's partner in South Africa, was chosen to provide SAFA with a comprehensive security solution including the C-TRUE's C-ENTRY face recognition based biometric system and video surveillance monitored from Stallion's state of the art "nerve centre".

C-ENTRY is an innovative and advanced biometric solution that uses individual's face as a key to grant access of use to premises which needs to be secured against unauthorized individuals.

C-ENTRY proved superb performance under extremely demanding conditions" claims" Alvin Flaum, Managing Director of Stallion Electronic Security. High profile trial sites in South Africa, including SAFA, all successfully evaluated and approved the C-ENTRY systems late last year.

"C-ENTRY is the first truly functional user friendly face recognition system we evaluated and tried in many local installations" claims Flaum.

South Africa will host in 2010 the FIFA world cup (<http://www.fifa.com/worldcup/>), expected to generate over \$ 500 million dollars in business and host hundreds of facilities.

SAFA The South African Football Association was founded on 8 December, 1991, the culmination of a long unity process that was to rid the sport in South Africa of all its past racial division. Four disparate units came together to form the organization in Johannesburg to set South African soccer on the road to a return to international competition after a lifetime of apartheid in soccer.

SAFA will host FIFA WORLD CUP 2010. (<http://www.safa.net/>)

C-TRUE specializes in 3D real time machine vision. Founded in 2006 it enjoys the academic atmosphere and resources of the Weitzman Science Park in Israel. C-TRUE is staffed by Mathematicians, Computer Scientists, Physicists and Engineers. Our labs include advanced physical simulation, strong mathematical infrastructure and an advanced optical laboratory. (<http://www.ctrueltd.com>)

STALLION SECURITY is a leading security systems and services provider in South Africa with over 7,500 employees nationwide. The Electronics arm of the company specializes in delivering integrated security solutions and remote site video monitoring services. (<http://www.stallion.co.za/>)
